Now we have a choice

BINNINGUP DESAL GETS THE CHOP

An incredible new water supply strategy means the Binningup desalination proposal can be scrapped and the Yarragadee protected forever.

See the full story on the back page.

TEACHERS DESERVE A FAIR GO

Teachers would have their pay scales linked to the salaries of Members of Parliament and students would be suspended for swearing or showing any aggression to teachers, as part of a package of reforms proposed by WA FAMILY FIRST.

The policy also calls for OBE to be scrapped in every year, more support staff to take the load off teachers, and the random use of sniffer dogs at private and government schools to end the sale of illicit drugs to school children. Check out the full story at WAFAMILYFIRST.COM or call the Hotline 97241136.

FED UP WITH ARROGANCE?

Are you fed up with bad behaviour and arrogance in Western Australian politics? WA FAMILY FIRST really is your safe alternative.

No Cameras. More Cops.

It's time to scrap revenue-raising speed cameras and replace them with a new road safety strategy based on a more visible Police presence on our roads and better driver training, according to WAFAMILYFIRST leader Dan Sullivan.

Dan Sullivan MLA

"An official UK government report was covered up until a whistleblower leaked it because it showed conclusively that Police patrols cut accidents significantly while the use of speed cameras actually led to an increase in serious and fatal accidents.

"Here in WA the road toll continues to climb and all the major political parties do is offer more of the same – more speed cameras and bigger fines."

"The Government of British Columbia in Canada replaced speed cameras with more visible Policing and serious accidents were reduced by 5.8% and fatalities fell by 10.9%.

Mr Sullivan said the government would have us believe speeding is the main cause of road accidents but secret Police statistics uncovered recently proved that speed was not the main cause.

Mr Sullivan said an effective road safety strategy should target the main causes of the road toll but the major parties liked speed cameras because they earned more than \$40 million a year for the government's coffers.

WA FAMILY FIRST has released a carefully researched strategy that replaced speed cameras altogether with more visible Police patrols, better driver education and a range of innovative policies.

The full plan is available now at WAFAMILYFIRST.COM or call the Hotline 97241136.
