To my Local WA Parliament Member

<http://www.parliament.wa.gov.au/web/newwebparl.nsf/iframewebpages/Members+-+Current>

I am writing to oppose any proposed ban on the use of safety radar receivers in Western Australia.

Safety radar receivers are an integral part of the highly effective, widely used, and Community Funded Road Safety Project - Safety Warning System "SWS" and tractor drone radar system.

This Government has failed to implement any Intelligent Safety System in WA although it has made commitments to do so. This Government has also failed to investigate the safety aspects of the state's only ITS, "SWS" even though it is extensively used on emergency vehicles, by road crews and at traffic blackspots.

It would appear this Government's only efforts at Road Safety is on buying more speed cameras which is a far cry from an Intelligent Safety System!

I call upon you to ensure the community funded SWS and Tractor Drone Radar system is properly investigated before any proposal to ban radar receivers is implemented which would effectively render the SWS useless.

As Road Safety is everyone's responsibility I request your personal views on this matter and not some pre-drafted departmental reply. I also request you as my local member, to pass on this letter of opposition to Parliament.

Yours sincerely
